Printable Ring Size Guide

You can find your size by measuring a ring you own (or one for the intended recipient) using the following methods

Method 1

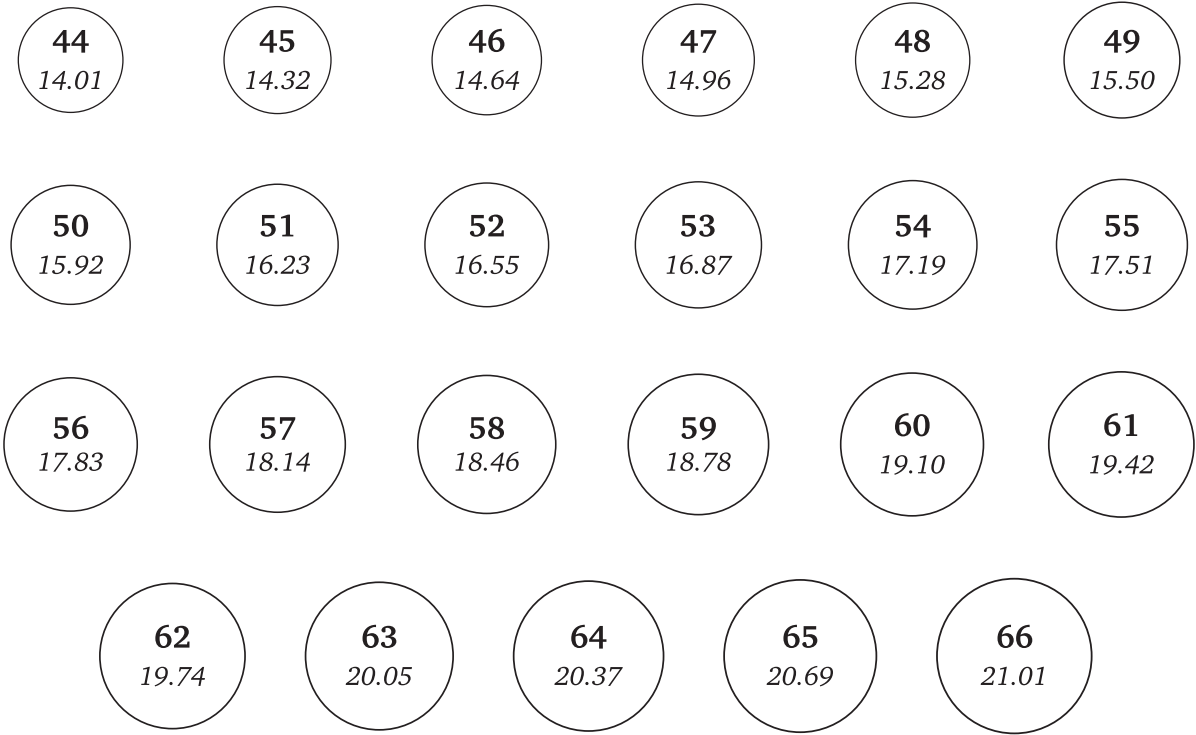

1. Print this Size Guide Chart on A4 size paper.

To ensure the printed dimensions are accurate, place a credit or any bank card on the rectangle below. If the card fits within the rectangle, the scaling is correct.

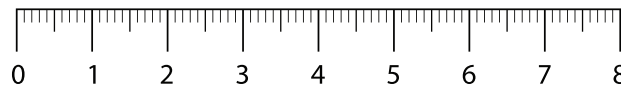

2. Place a ring that fits you on the circle below to find your correct ring size

3. Ensure that you measure the inner circumference of your ring.

Method 2

1. To begin, get a strip of paper or string, a pen, and a millimetre (mm) ruler
2. Wrap the paper or string around your finger and mark the overlapping point.
3. Measure the length to the marked spot with the help of the ruler.
Note its circumference and refer to the below chart to find the right size.

| Diameter (mm) | Circumference (mm) | EU | US | India |
